

One Language – lyrics

We're coming from different places
From kitchens, from books, from code and data
We talk in tastes and stories
Or in themes and meanings deep like the sea

We sit by the same blue water
Watching, but rarely speak
Our words are shaped in silence
Different tongues, no common beat

Prime Arch – one language, many minds
Prime Arch – building bridges of every kind
Prime Arch – from quiet to talking, from fog into light
Prime Arch – always

Imagine a game at the hotel
Where food and stories play as one
From poolside into teamwork
And suddenly, we must all become one

No time to invent a new language
No more silos, no more walls
We need what already works
A way to connect us all

Prime Arch – one language, many minds
Prime Arch – building bridges of every kind
Prime Arch – from quiet to talking, from fog into light
Prime Arch – always

Words are metaobjects
Grammar is connection
Views are how we tell our stories
To share a direction

No matter the tools you're using
Paper or code or digital streams
With Prime Arch the language is ready
For everyone building dreams

Prime Arch – one language, many minds
Prime Arch – building bridges of every kind
Prime Arch – from quiet to talking, from fog into light
Prime Arch – always

Prime Arch – one language, many minds
Prime Arch – for process, data, and designs
Prime Arch – same rhythm, same purpose, same lines
Prime Arch – always
