

# Scope it Right – lyrics

Don't get lost in the details, keep it clear,  
Only model what we need, don't disappear.  
Every piece, it has a purpose, can't ignore,  
Build it smart, and the value will soar.

Start with the question, that's where we begin,  
If it doesn't answer, don't let it in.  
Look for the shared, what's used everywhere,  
Keep it relevant, show you care.

Scope it right, don't waste your time,  
Keep it simple, make it shine.  
Relevant models that are up to date,  
Support the decisions, don't hesitate.

Scope it right, it's how we grow,  
With clarity, we'll always know.

Processes changing, info flows tight,  
Focus on what's crucial, make it bright.  
Consultants work fast, keep it on track,  
Enterprise architects, no looking back.

Start with the question, that's where we begin,  
If it doesn't answer, don't let it in.  
Look for the shared, what's used everywhere,  
Keep it relevant, show you care.

Scope it right, don't waste your time,  
Keep it simple, make it shine.  
Relevant models that are up to date,  
Support the decisions, don't hesitate.

Scope it right, it's how we grow,  
With clarity, we'll always know.

Maintenance in mind, build it to last,  
Let's leave behind what's moving too fast.  
Clarity and structure, that's our guide,  
With Prime Arch, we take it in stride.

Scope it right, don't waste your time,  
Keep it simple, make it shine.  
Relevant models that are up to date,  
Support the decisions, don't hesitate.

Scope it right, it's how we grow,  
With clarity, we'll always know.
