

Show Just Enough – lyrics

Keep it light when the lights are on
Tell the story so they sing along
But behind the stage, the lines connect
Every detail, every side effect

Don't hide the truth, don't flood the view
Show the part that answers you
The question right here, right now
Not too little, not too loud

Onstage, keep it clear, keep it bright
Backstage, let the patterns take flight
Show just enough to make it right
That's the art, the balance, the light

People say, let's make it all so plain
But real life's got a deeper chain
Systems talk, and the rules align
You need the map to walk the line

Don't hide the truth, don't flood the view
Show the part that answers you
'The question right here, right now
Not too little, not too loud

Onstage, keep it clear, keep it bright
Backstage, let the patterns take flight
Show just enough to make it right
That's the art, the balance, the light

It's not black or white, it's how you play
The shade and shine in the same display
Precision, purpose, guiding the way
Make it useful, day by day

Onstage, keep it clear, keep it bright
Backstage, let the patterns take flight
Show just enough to make it right
That's the art, the balance, the light
