

What it Does, How it Flows – Lyrics

What it does and how it flows
Two dimensions we must know
If the system works on time
Then the future can align

It's not enough to make it run
We need speed, we need the sun
Every detail, every sign
Keeps the value clear and fine

Write it down, don't let it fade
Every promise must be made
What it does and how it shows
That's the way the value grows

If it's slow, the trust is gone
No one waits for very long
But when it works the way it should
Every moment feels so good

What it does and how it flows
Two dimensions we must know
When we see both side by side
We can build with lasting pride

Stronger now, when all is clear
Every choice brings value near
Not just function, but the way
Makes tomorrow shine today

What it does and how it flows
Two dimensions we must know
When we see both side by side
We can build with lasting pride
